Abstract. My abstract

Text goes here.

$$\mathbf{y} = \mathbf{X}\boldsymbol{\beta} + \boldsymbol{\varepsilon}$$

```
fit <- lm(y ~ age + treatment, data = my_data)
```

Algorithm 1 Group descent algorithm for the group lasso

```
repeat
  for  $j = 1, 2, \dots, J$ 
     $\mathbf{z}_j = \mathbf{X}_j^\top \mathbf{r} + \beta_j$ 
     $\beta'_j \leftarrow S(\mathbf{z}_j, \lambda_j)$ 
     $\mathbf{r}' \leftarrow \mathbf{r} - \mathbf{X}_j(\beta'_j - \beta_j)$ 
until convergence
```

Tibshirani (1996) introduced the lasso.
